PROFESSIONAL SUMMARY

Data Analyst with an Economics background and hands-on experience in analytical projects across business performance, customer analytics, and inventory operations. Skilled in SQL, Excel, and Tableau, with experience in KPI analysis, data modeling, and dashboard development to identify performance gaps and business improvement opportunities.

ANALYTICAL PROJECTS

Business Performance, Margin & Growth Analysis *Jun 2026 – Jul 2026*

Developed three interconnected Tableau dashboards, analyzing 6M+ retail transactions across 35 stores in 7 countries to evaluate revenue growth, profitability and store performance.

- Analyzed business performance across 2023–2025, identifying **$283M in net revenue, a 57% gross margin** with 13% year-over-year revenue growth.
- Compared profitability across product categories, identifying Children's as the lowest-margin category (53.8%) despite leading growth at 15%.
- Identified **$3M in potential profit improvement** across underperforming stores by benchmarking their margins against the company-wide average.

Revenue Risk & Customer Dependency Analysis *May 2026 – Jun 2026*

Analyzed customer purchasing behavior and revenue concentration across a global retail business using PostgreSQL.

- Ranked 87K+ customers by revenue and profit, finding that the top 20% generated 43% of revenue and 44% of profit.
- Applied RFM metrics and percentile-based segmentation to assess high-value customer behavior, identifying 1K+ declining customers with **$78M revenue and $44M profit at risk.**
- Mapped customer revenue risk across multiple stores, identifying **$27M in online channel** exposure and 18 high-risk physical stores accounting for $34M in at-risk revenue.
- Built a PostgreSQL workflow with reusable views for high-value and at-risk customer segments.

Retail Shrinkage & Inventory Optimization Analysis *Feb 2026 – Apr 2026*

Analyzed 15M+ sales and inventory records for a wine and spirits retailer operating across 80 stores using PostgreSQL and Tableau.

- Quantified store-level shrinkage from inventory movements, identifying $199K in estimated revenue loss across 41 stores, with the four stores accounting for 65% of the total.
- Evaluated inventory turnover and vendor delivery discrepancies, identifying **$28M in slow-moving inventory** across 8K+ SKUs with over 90 days of supply, alongside a 35K-unit cumulative under-delivery from a single vendor.
- Built a Raw, Clean, and Gold pipeline, modeling six source tables into a star schema.

CORE COMPETENCIES

- KPI Analysis & Reporting
- Performance Analysis
- Insight Communication
- Dashboard Development
- Data Modeling
- Data Cleaning & Validation

TECHNICAL SKILLS | Microsoft Excel · PostgreSQL (SQL) · Tableau · Power BI

EDUCATION

EDUCATION | B.Sc. Economics, Virtual University of Pakistan *Mar 2022 – Mar 2026*

CERTIFICATE | Google Data Analytics Professional Certificate | Coursera
